

A black and white photograph of a woman with braids, smiling and kneeling in a greenhouse, tending to plants. Another person is partially visible in the foreground, also working with plants. The background shows the curved structure of the greenhouse.

I get it

to protect

***myself,
my family, and
my community
from flu***

A flu shot doesn't just protect you from flu. It helps protect your community too. People with certain chronic conditions like asthma, heart disease, or diabetes are at higher risk of developing serious flu complications.

In fact, 90% of adults hospitalized with flu have an underlying medical condition. ***That's why it's important for everyone to get a flu shot every year.***

LEARN ABOUT YOUR FLU RISK.
